

BASKETBALL SKILLS

A non-competitive basketball experience using basketball drills as a way to empower kids while also working on motor skill development and social interaction.

Assist Hoops is a program of the Northeast Ohio Basketball Association. This year's event will serve as a pilot program with plans to create a more inclusive skills team league for 2024. The emphasis of this skills team will be children with Autism, ADHD, Epilepsy, Neurological Disorders, and other mental/ emotionL challenges.

This years one day skills practice team will consist of 90 minutes of basketball skills work, ranging from dribbling, passing, shooting drills, that will work their motor skill development, raise their confident and make a new friend along the way.

An all-star type player has endless choices of camps and leagues and teams to play on. Assist Hoops hopes to make those who don't have as many options feel like they are an all-star too.
